  - Specialized level
  - Distinctive level
  - Outstanding level
- ✓ Discipline the world ruler.

Discipline Switches

I will start this article by defining the word discipline.

Discipline is the ability and willingness to do what you are supposed to do.

Sometimes what you are supposed to do can be unpleasant but it is the healing and vaccinating medicine.

This means that you have to perform a thorough research to know what you are supposed to do.

This will be, not only for your benefit but still for the benefit of the public.

There are different types of discipline and all of them require different types of discipline switches.

I hope you know that here in earth we have many systems that use switches and different systems use different switches.

Electrical systems use electrical switches.

Electronic systems use electronic switches.

Digital systems use digital switches e.g. smartphones.

Mechanical systems use mechanical switches.

The above illustrated switch examples shows that different systems use different switches for their proper functionality to take place.

That is why I have told you that different discipline areas require different switches application.

Discipline switches

These are none other but the five linguistic words that are normally used in each and every sentence either directly or indirectly.

When I explain about them people ask me why are they five and not seven but according to my linguistic research and leadership research I found them to be five and I will explain why.

The five discipline switches are as follows:

- **The what switch**
- **The how switch**
- **The where switch**
- **The when switch**
- **The why switch**

- **What investment project do you want to venture in?**
- **Why do you want to venture in that project?**
- **When will you venture in that project?**
- **Where will you do that project?**
- **How will you do that investment?**
  I.e. who will be the team workers?
  Which investment tools and entities will you use?

According to my research I found these switches to be five and not seven.

The who and which switches are swallowed by the five and especially the how switch it has a big stomach to swallow them.

E.g. how will you develop a web controlling software?

In the above sentence you will have the questions like:

Which methodology will I use to develop the above software?

Who will be the team workers in this software project?

The above switches of discipline you have to apply them appropriately in your project process to achieve the best results.

Still you need them to block and overcome any inconveniences that can come in your project development process.

Types of discipline

Financial and economical discipline: this is the ability and willingness to manage finances in a proper way that can be beneficial to you , to your descendant and even to the public.

Social discipline: this is the ability and willingness to behave and associate with others in a proper way that can yield a profit to you and in turn to your descendant.

Health discipline: ability and willingness to adopt the health behaviors that will be beneficial to your biological systems.

Spiritual discipline: ability and willingness to allow and accept the proper spiritual message to be planted into your heart and your mind and to allow them to dominate your psychological systems.

Psychological discipline: this is the ability and willingness to engage your mind and heart into proper activities that will yield a profit to you.

Political discipline: ability and willingness to adopt a political behavior that will yield a profit to the electorate that sent you into the office.

Putting the electorate interest first rather than putting your own interest first.

Leadership discipline

This is the skills, expertise, knowledge, wisdom and ability to manage, coordinate and control activities in appropriate way in order to achieve the set objectives.

Leadership is not a noble term but is term that is a portion to each and every earth resident under the sun.

Every human being under the sun has a leadership call but in his own area and he is supposed to shine in it.

Leadership Analogies

I will give you several analogies to show you that everyone was called to be a leader in his or her own area.

Plant analogy

The way you see that plants are leaders in their own areas that is how human being are supposed to be.

e.g. The bean plant though very small it produces what the cedar plant is not able to produce.

The two are interdependent either directly or indirectly.

The man has to eat beans (food) so that he can have strength to prune the cedar tree, such that it can grow to the stature that is supposed to grow.

When the cedar produce timber the timber are used to construct a granary where the bean will be stored after being harvested.

Biological analogy

Each cells and cell organelle inside human body perform the function that the other body organ cannot be able to perform.

The immune system with its micro cells is able to fight pathogens and other disease causing microorganism and your own hand however how strong it is cannot be able to fight these pathogens.

Human beings are leaders in their own area but how many are able to implement the leadership capacities that are in them.

Leadership attributes

What I am referring to leadership areas is what you can do better than any other person under the sun if maximum capacity appears.

Every human being is unique to each other and is gifted differently.

Unless the maximum capacity of your leadership area appears you uniqueness will never be known since you are operating with generalization concept.

Many people can be called in one leadership families e.g. finance family but if their capacity manifest maximum there will be distinction between those individuals.

LEADERSHIP OPERATIONAL LEVELS

When your leadership area start manifesting it follows the following levels.

- ✓ **Infancy level and childish level: in this level you start feeling that there is inward power that is trying to spring up from you. You can pave the way for it or block it according to the exposure you normally give it especially psychological exposure and spiritual exposure.**
- ✓ **Maturity level: at this level the inward power and capacity start manifesting but making just a small impact which can be to you only and to some other few people and entities.**
  Many people stop here and they are here up to now because they were only looking for a livelihood earning source.
  Many people in the world are in this stage little they did not know this was not their destination.

- ✓ **General level: in this level people start making a greater impact. If his or her colleagues are in level 2 that we have just spoken about this person is deceived that he has entered into outstanding level.**
  The reality will come when other competition will come which will be either internally driven or externally driven and he will be removed from his or her comfort zone.
- ✓ **Specialized level: those who are in this level are global elites. They have to work hard so that they can reach to the real outstanding level where they will be able to solve complex problem that are affecting humanity and devastating nation's economy.**
  They should work hard such that they can predict and mitigate risks that are expected to appear more than ten years to come.

They should not be myopic telling us the things to come just few months before they manifest.

E.g. this pandemic called covid 19 that has devastated global economy, they could have seen it more than ten years before it appear.

They could have strategized upon it and block it from occurrence.

This could have been done by cooperation between the healthy experts, psychological experts, philosophical experts, medical experts, spiritual experts etc. but all of them must have reached the outstanding level as far as their leadership is concerned.

I normally say, "If you do not prepare you will repair and sometimes repairing can be difficult".

The meaning of the above saying is calling you to strategize in advance.

- ✓ **Distinctive level: this stage is meant to solve complex problems and very few people reach here.**

This stage from the time the earth came into existence until now few has reached here.

For sure this stage you cannot reach unless you have a good relationship with AL MIGHTY GOD who gave you that gift.

Joseph is one of the character in the bible who reached this level in his leadership area of economics and he performed food economics assignment in Egypt which left Egypt standing as a global powerful nation.

- ✓ **Outstanding level: this is the level that is associated with miracle and wonders since your leadership area is accompanied by holy supernatural powers to perform miracles and wonders to**

convince mankind about the existence and supremacy of the Most High GOD.

Moses in his judicial and advocacy leadership area was able to reach this level.

Through his judicial capacity accompanied by miracle and wonders was able to nullify all the laws that govern nature.

He could touch the Nile with his staff and then all the water turn into blood, even the water that were in the water cans of Egyptians. The waters that were in the territories where Israelites were remained clean and all the plagues that Moses brought into Egypt did not touch the territory of Israelites. (Exodus 7:20-21)

The other person who reached this level was Apostle Paul.

Still in judicial and law leadership Paul was able to withstand the accusation of lawyer Tertullas.

Regardless of how the lawyer was educated Paul was defeating him in the case before the roman authorities both kings and governors. (Act 24:1…)

This was only one leadership area of Paul since he had five areas but was not able to utilize them maximum.

Discipline the world ruler

You have to know that discipline is the world ruler.

In one hand he has the reward to reward the obedient and in the other hand he has the disciplinary rod to apply it on the back of the disobedient.

He cannot be corrupted or bribed and he knows everything you do whether you have done it in public or secretly.

No one can block him from achieving his objective except the word of GOD if you have repented and turned away from your ways.

Discipline is able to mobilize all powers of earth , from the air waves and even the supernatural to come and rally around him so that he can achieve his objective both to the obedient and disobedient.

If you fail to apply the required discipline in different areas of life, you will have a life full of mourning.

For your own information this is the major cause of all problems that happen under the sun.

Even the current disaster that is called corona virus has been brought by indiscipline whether it was made from the laboratory or it hopped from animal society the truth of the matter is that indiscipline is the root of it.

If you have the root of indiscipline or any nation has this root, this nation or person will be leaving with endless mourning process.

If it is a person will be experiencing things like:

- **Financial and economic scandals and many other scandals**
- **bankruptcy**
- **Endless court cases**
- **Diseases, sicknesses and illnesses and many others.**

If it is a nation will be experiencing things like:

- **Economic recession and depression**
- **Natural disasters i.e. floods, lashing storms, earthquakes,**
- **Social disasters i.e. terrorism, endless demonstrations and protest,**

The demonstration does not mean that the working indiscipline root is in governmental authorities, no it may be in protesters themselves although I do not say the government is immune to it.

For you to know various types of indiscipline roots that are in you, you need to be taught by men and women who are blessed with this kind of knowledge, wisdom, understanding and intelligence.

So that you can live a cautious life as you are roaming in this planet earth.

Questions, opinions and suggestions are highly welcomed through our web email.
